

 **School Closings**

August 24, 2016

Dear Clayton Township Offices residents,

It's easy for you to get closing and change of schedule information.

ABC12 offers instant wireless web and text message alerts, in addition to our bulletins on TV and our list of closings on the web.

Here is how the system works:

On your computer go to abc12.com and click on the "ABC12 Everywhere" box that you'll find on the right side of our home page.

Once you've arrived at our wireless web page, you can learn how our system works, which wireless carriers are compatible with our wireless web site and how to sign up for our wireless web service.

Users can also sign up for closing text alerts. With this feature, anyone who has signed up for a given entity will receive a text message on their wireless device whenever the status of that entity changes.

ABC12 charges nothing for either of these services. Wireless carrier charges depend on the company and the subscriber plan. Users should check to see if their plan accommodates their needs.

Thank you for considering this community service of abc12.
